Chalgyr's Game Room writes: Being a huge fan of Super Smash Bros. dating back to the N64 and right through to the Wii U, the idea of something similar in the same genre coming to the PC was very appealing. If the game could be easily accessible to play with friends through a platform such as steam? Even better - I was already sold. Since then however, there haven't been that many titles to really try capitalize on this idea with limited selections such as Brawlhalla and Megabyte Punch, I wondered what Brawlout could offer compared to the competition. {jumi [ad.php] }
